Acronis Company Overview

Global data protection provider for physical, virtual and cloud environments with the next generation of backup, disaster recovery and storage technology.

Acronis has protected **over 200,000 virtual machines** worldwide to date.

Acronis has helped businesses **move nearly 1,000,000 servers** between **physical**, **virtual** and **cloud environments**.

More than 175,000 business customers across all industries

Channel-driven model with **more than 25,000 partners**

More than **2.5 million licenses sold in 90 countries**;

Founded in 2002

18 offices worldwide

700 employees

Acronis Backup & Recovery 11.5
Features and Benefits

ABR11.5 Features

Acronis® Academy™

- **Disk image-based backup** for fast backup of entire Windows or Linux systems or files/folders on physical and virtual machines
- **Centralized management** capabilities to manage, monitor and report on backups of multiple servers and workstations
- **Catalog and search** functionality to quickly locate user files for easy recovery from backups
- **Acronis Universal Restore** for recovery to dissimilar hardware or VM for reliable recovery and P2P, P2V, V2V and V2P migration
- **Deduplication** of backups to save on network utilization and storage space
- **Acronis Cloud Backup** enables backup to the cloud for secure off-site storage of critical data

01 ABR11.5 Advanced Platform

Acronis® Academy™

Acronis Backup & Recovery 11.5 **Advanced Platform** is a unified solution for backup, disaster recovery and data protection in physical-virtual environments for Windows and Linux systems and applications.

Unified Platform Agents

Agent for Windows / Linux

- For image and file backup of physical servers or workstations
- Can also be used on virtual machines
- Centrally managed from AMS

Agent for VMware vSphere

- For agent-less backup of VMware virtual machines
- Installs as a virtual appliance or on a Windows machine
- Centrally managed (and automatically deployed) from AMS
- Stand-alone alternative is vmProtect

Agent for Microsoft Hyper-V

- For host-based agent-less backup of Hyper-V virtual machines
- Centrally managed from AMS
- No stand-alone alternative

New! Agent for Microsoft Exchange Server

- Backup of Microsoft Exchange Server datastores and mailboxes (with clusters support)
- Centrally managed from AMS

Key Features and Competitive Advantages

Acronis

- Fast and easy to use technology
- Windows and Linux support
- Recovery to dissimilar hardware for Windows and Linux
- File-based backup and recovery
- Individual files and application data recovery from image backup
- Support for Microsoft Exchange, Microsoft SQL, Microsoft SharePoint, Microsoft Active Directory
- Unlimited, any to any migrations
- Converting backups to VM format
- Compression and 256-bit AES encryption
- Staging of backups between multiple locations automatically
- Scheduled backup with automatic retention and built-in backup schemes
- Acronis Secure Zone with F11 boot (ASRM)
- Disaster recovery plan is automatically generated
- Support for disk, network shares, tape, FTP, CD/DVD and cloud
- Supports physical and VM machines
- Support BIOS and UEFI; MBR and GPT disks

Acronis Backup & Recovery 11.5 Licensing Highlights

- Licensed per protected machine be it workstation, laptop or server
- Virtual solutions via platform agents: one license for each physical host machine supporting an unlimited number of VMs per host server and migration
- Bundles with Acronis Universal Restore and Deduplication options
  - New! For each bundle, one installer and only one bundle key will be provided.
- Trial Versions
  - Update from a trial to the full version of the software without re-installing the product. The trial will convert to the full version.
